## BATTERY CHARGER WITH DESULPHATOR

FOR BATTERIES 12V MIN 60 Ah - MAX 200 Ah

The NDS Group Electronic Department has conceived and planned, after a careful research and experience about battery sulphation, a special electronic battery charger.

The battery charger with the desulphation system, model P.C.B. 12-15, is a battery charger for professional use, able to charge and desulphate the battery (unless that the sulphation is at an irreversible phase). Laboratory tests shows that over 80% of the batteries with low yield owing to the sulphation, are recovered at 100% by P.C.B.

## POWER TEST BATTERY

**CODE**  
**PTB 12-10**

The Power Test Battery is a device which allows to measure the quantity of amperes (Ah) supplied by a battery, determining, like this, its actual capacity.

## DIGITAL MULTIMETER

CODE  
MTD 100

Digital multimeter with graphic bar, capacitance meter, frequency meter, thermometer.  
Large 3 1/2-digit display LCD 40mm.  
Automatic polarity indication.  
Auto-power off function.  
Automatic exhausted battery indication.  
Out of scale indication.  
Rotary selector switch with 30-range positionings.  
Data Hold.  
Backlit display.

## DIGITAL AMPEROMETRIC CLAMP

CODE  
PDA 100

Amperometric pliers with digital multimeter.  
3 1/2-digit LCD display (3200 points reading) with 33 elements graphic bar.  
Manual/automatic functioning and symbols indication.  
Jaws-spread for cables  $\varnothing$  50mm. max. equipped with case and test leads.
